Children love animals and close contact with them. The new furniture series Fantasy is intended to meet these needs. The same size modules differ only in decorations on the fronts. A complement to the series is a teacher's desk. The furniture is ideal for day care centres and nursery schools by organizing functional space. With the wide range of modules,

interiors can be arranged so as to meet the needs of the youngest. The universal colour scheme makes a background for various decorations and accessories. The furniture comes in a set, but a particular piece can be bought separately. An interesting addition to the series of ten modules are soft foam discs with animal motifs matching those on the furniture.

PRIMA

The central theme of the economy series Prima are muted colours and a wealth of combinations. Its formal minimalism and functionality make it a universal set of furniture, ideal for a classroom, biology room, teachers' room or the head's office.

The spacious cubby holes will accommodate educational aids, ring binders, books and class registers. The open shelves are intended for the handiest objects and documents. The lockable units will be useful for important documents or aids with restricted access.

FRESH

Our furniture series Fresh allows for optimum adaptation of a room, while giving it lightness. This is possible thanks to the variety of wall cabinet and shelving types and all the cupboards are available in two sizes. Additionally, the legs and castors create an extra space which makes the room look larger, as well as providing easy access underneath for cleaning.

The shelf units are available in several types and all the medium standing units in two width sizes.

The distinctive feature of the line are the colourful shelves; the distances between them allow for easy storage of documents and ring binders.

The new version of Fresh furniture line helps arrange the classroom so as to display educational aids in a better way. Children may watch models and figures through the glass doors of cabinets to which, however, only the teacher has the keys.

This line is particularly recommended for biology classrooms, in which observation and experimentation are the most commonly used teaching methods.

- three colour options: orange, green and birch;
- two sizes of standing and hanging cabinets (92 and 47 cm).
- coloured shelves
- handy handles (the colour matches that of the doors, drawers and shelves)
- easy assembly
- sold with legs
- plastic legs (orange, green or brown; 4 pieces, H 10 cm)
- accessories sold separately

*Height without legs or castors.

- in case of legs you should add 10 cm

TALL CABINETS

92 x 45 x 176 cm (height with legs)

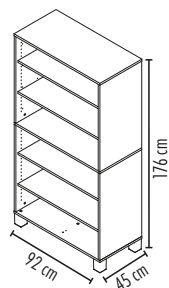

Tall cabinets are a good storage place for educational aids or documents. All things that you want to keep safe yet handy should go into cabinets and drawers. Books are most handy on open shelves and aids will look their best behind glass lockable doors.

With height-adjustable shelves you can make the most of the cabinet space.

Things intended to be accessible to all are best placed on open shelves. Those used under the supervision of a teacher should be locked behind a glass door.
